

## Ohio Gas Access Partnership

# ENERGY IS ESSENTIAL FOR SMART GROWTH

---

**We are a coalition of businesses and community stakeholders seeking solutions for our region's future energy needs.**

CENTRAL OHIO IS THE FASTEST GROWING AREA OF THE STATE. DEMAND FOR COST EFFECTIVE, CLEANER ENERGY WILL CONTINUE TO CLIMB AND WITHOUT APPROPRIATE INFRASTRUCTURE, NEW JOBS AND ECONOMIC GROWTH WILL BE IMPACTED.

Ohio has an abundant supply of natural gas with more than 11 major transmission pipelines and many smaller pipelines serving customers.

# OUR GOAL:

Build additional supplies of natural gas to the region to support balanced and sustainable industrial, commercial and residential development.

- In 2015 NRG Management identified the extent of the capacity issue.
- Future capacity limitations will impact Madison, Union, Pickaway and Franklin Counties.
- In Union County, natural gas capacity may be fully utilized within 5 years at current growth rates.
